

Counter Transference and Somatic experiences 17th May 2025

Dear Group,

I realized that I made an error in the information I sent out to you on 11th April.

I asked you to take half a paper each to digest and present to the group. I meant to ask you to each look at one paper each with the fifth person presenting the clinical session.

I understand Rachel will be presenting the clinical material and so would ask that you divvy up the four papers between Erin, John, Alison and Clare.

Each presentation needs just be an overview or you might have some aspect of it that you'd like to think more about with the group. This isn't designed to be an onerous task but instead to help us focus in closely on the papers. I would suggest presenting for no more than ten minutes each so we have time for discussion.

Though I'm asking you to look more closely at one paper each, it will be helpful to read all four to enrich our discussion.

I'm very much looking forward to working together.

With best wishes

Laura
